Bill,

The entire NDC was furloughed, so nothing was completed during the shutdown. Normally, from the end of December through January, we index approximately 175,000 pages, close around 20 FOIA/MDR cases (roughly 3,000 pages), complete assessment and QA review on 560,000 pages, and review approximately 120,000 referrals in the Interagency Referral Center. In addition, we missed the quarterly publication of our release list (public notification that approximately 500,000 pages are being moved to open shelves), and were unable to help at least 4 researchers and 2 agency reviewers who had scheduled appointments in January.

Is there anything else you would like to include?

If you need any more information I will be available on my personal cell (b) (6)

David
